Junior  
Full-Stack Developer

# Serhii Kyslynskiy

A beginner, but I'm competent and ready to fulfill various tasks with purpose and zeal. Experienced in negotiations with clients and team interaction. I'm striving for self-development. Now I'm learning typescript. Searching for remote job, but I'm ready to relocate.

## PROJECTS

[Petly](#) / [link git front-end](#) / [link git back-end](#)

Web app helps find and sell pets. In this team project developed back-end and front-end. Front is implemented using React.js, Redux, RTK Query, React Router, Styled-components. Back - Node.js, Express, Mongoose.

[Filmoteka](#) / [link git](#)

Responsive landing for film database. Team project, I've made film modal card and authentication using Firebase. Handle localization in En and UA. Used HTML, SASS, JavaScript, Parcel, Firebase, YouTube API, Movie DB API.

[IceCream shop](#) / [link git](#)

Responsive landing for IceCream shop. First project in team, my part of job was creating the Header, Hero, Mobile menu and Order form. Used HTML, SASS, BEM, JavaScript, JQuery, Parcel.

[Sunny](#)

Freelance project created in Webflow with HTML, CSS, and JavaScript. I used CMS to dynamically create templates for products and blog posts, so clients could add new products and posts, edit them, or delete them without developer intervention.

## EXPERIENCES

### Freelance Front-end Developer

Oct 2022 - Present

- Completed multiple front-end development projects for clients across various industries, using technologies such as HTML, CSS, JavaScript.
- Collaborated with a team of designers to create visually appealing and user-friendly websites with responsive design.
- Worked closely with clients to understand their business requirements and translate them into effective front-end solutions.
- Designed and developed responsive websites using Webflow, including custom animations, interactions, and integrations with third-party tools.
- Configured and customized Webflow CMS for clients, including creating custom collections, templates, and implementing dynamic content on websites
